Naval Research Logistics

Contents

Volume 42, 1995

Issue 1, February 1995

Scheduling Peacetime Rotation of Pakistan Army Units
R.F. Dell, R.E. Rosenthal, and S. Baig 1

Search for an Infiltrator
L. Pavlovic 15

Criteria and Approximate Methods for Path-Constrained Moving-Target Search Problems
L.C. Thomas and J.N. Eagle 27

Service Levels in Distribution Systems with Random Customer Order Size
E.P. Chew and L.A. Johnson 39

Expressions for Item Fill Rates in Periodic Inventory Systems
M.E. Johnson, H.L. Lee, T. Davis, and R. Hall 57

Weighted Vertex Packing Problem for Specially Structured Geometric Graphs
G. Yu, P. Kouvelis, and S. Luo 81

Dual Criteria Preemptive Open-Shop Problems with Minimum Makespan
G. Vairaktarakis and S. Sahni 103

The Advantage of Deeper Pockets In Silverman's Game on Intervals
G.A. Heuer and U. Leopold-Wildburger 123

Note: Open-Shop Scheduling with Release Dates To Minimize Maximum Lateness
H. Kellerer, T. Tautenhahn, and G. Woeginger 141

Issue 2, March 1995

Special Issue on Air-Land-Naval Warfare Models. Part I

Theater-Level Modeling

Introduction to the Special Issue on Air-Land-Naval Warfare Models
J. Bracken, M. Kress, and R.E. Rosenthal 147

An Introduction to Variable-Resolution Modeling
P.K. Davis 151

Cutting Some Trees to See the Forest: On Aggregation and Disaggregation in Combat Models
R.J. Hillestad, and M.L. Juncosa 183

Experiments in Variable Resolution Combat Modeling
R. Hillestad, J. Owen, and D. Blumenthal 209

A Stochastic Version of the Concepts Evaluation Model (CEM)
R.E. Johnson, E.K. Isensee, and W.T. Allison 233

Weapon System Analysis

A Synthesis of Methods for Simulating Vulnerability of Armored Vehicles
F. Gavril 247

A Salvo Model of Warships in Missile Combat Used to Evaluate Their Staying Power
W.P. Hughes, Jr. 267

The Analysis of Ship Air Defense: The Simulation Model SEAROADS
M.P.F.M. van Dongen and J. Kos 291

Issue 3, April 1995

Special Issue on Air-Land-Naval Warfare Models. Part II

Mathematical Models of Combat

A Proposed Foundation for a Theory of Combat
C.J. Ancker, Jr. 311

Attrition Formulas for Deterministic Models of Large-Scale Combat
L.B. Anderson 345

On Weapons Scores and Force Strengths
L.B. Anderson and F.A. Miercort 375

Efficient Concentration of Forces, or How to Fight Outnumbered and Win
D.L. Bitters 397

Termination Decision Rules in Combat Attrition Models
N.K. Jaiswal and B.S. Nagabhushana 419

"The Influence of the Numerical Strength of Engaged Forces in Their Casualties," by M. Osipov
Translated by R.L. Helmbold and A.S. Rehm 435

A Modified Lanchester Linear Process Calibrated to Historical Data
J.R. Scales 491

A Fast Approximation of Homogeneous Stochastic Combat
J. Yang and A.V. Gafarian 503

Issue 4, June 1995

Special Issue on Air-Land-Naval Warfare Models. Part III

Command, Control, Communications, and Intelligence

Simple Probability Models for Assessing the Value of Information in Defense Against Missile Attack
R. Almeida, D.P. Gaver, and P.A. Jacobs 535

Quick-Response Assessment of Forward Air Control and Communications Using a Queueing Model and Digital Simulation
D.A. Samuelson and R.L. Sims 549

Historical Analysis

Lanchester Models of the Ardennes Campaign
J. Bracken 559

Lanchester Modeling and the Biblical Account of the Battles of Gibeah
I. David 579

A Mathematical Model of Attrition Data
D.S. Hartley III 585

Validating Lanchester's Square Law and Other Attrition Models
D.S. Hartley III and R.L. Helmbold 609

Rates of Advance in Land Combat Operations
R.L. Helmbold 635

Cost Effectiveness Analysis

Use of the Amphibious Warfare Model to Evaluate the Cost Effectiveness of Alternative Marine Corps Amphibious Assault Vehicles
G. Akst 671

Modeling in Support of Operations Desert Shield and Desert Storm

The Combat Simulation of Desert Storm with Applications for Contingency Operations
J.A. Appleget 691

Analysis of Air Operations During DESERT SHIELD and DESERT STORM
F.T. Case, C.W. Hines, and S.N. Satchwell 715

Issue 5, August 1995

Scheduling Target Illuminators in Naval Battle-Group Anti-Air Warfare
H.D. Sherali, Y. Lee, and D.D. Boyer 737

Some Comments on the Optimal Assembly Problem
F.K. Hwang and U.G. Rothblum 757

Strategic Investment to Reduce Setup Times in the Economic Lot Scheduling Problem
G. Gallego and I. Moon 773

A Primal-Dual Algorithm for the Dynamic Lotsizing Problem with Joint Set-up Costs
O. Kirca 791

Approximate Evaluation of Batch-Ordering Policies for a One-Warehouse, *N* Non-Identical Retailer System Under Compound Poisson Demand
S. Axsater 807

Short-Term Retrenchment Planning in Hierarchical Manpower Systems
J.K. Sankaran 821

An (*s*,*q*) Inventory Model with Stochastic and Interrelated Lead Times
R. Heuts and J. de Klein 839

Assemble to Order and Assemble in Advance in a Single-Period Stochastic Environment
A. Eynan and M.J. Rosenblatt 861

Issue 6, September 1995

Optimal Force Mix in Heterogeneous Combat
N.K. Jaiswal, M. Kumari, and B.S. Nagabhushana 873

Single-Stage, Multi-Product Production/Inventory Systems With Lost Sales
T. Altiok and G.A. Shiue 889

The Single Period Procurement Problem Where Dedicated Supplier Capacity Can Be Reserved
K. Jain and E.A. Silver 915

Makespan Minimization for *m* Parallel Identical Processors
J.C. Ho and J.S. Wong 935

Scheduling to Minimize Release-Time Resource Consumption and Tardiness Penalties
C.-L. Li, E.C. Sewell, and T.C.E. Cheng 949

Restricted Planar Location Problems and Applications
H.W. Hamacher and S. Nickel 967

A Suboptimality Bound for Permutation Policies in Single Machine Stochastic Scheduling
K.D. Glazebrook 993

Issue 7, October 1995

Multiperiod Resource Allocation with a Smoothing Objective
H. Luss and M.B. Rosenwein 1007

Optimal Cutoff Strategies in Capacity Expansion Problems
M. Monticino and J.Weisinger 1021

Gittins-Index Heuristics for Research Planning
K.D. Glazebrook and R.W. Owen 1041

A Replacement Model with Overhauls and Repairs
X.-G. Liu, V. Makis, and A.K.S. Jardine 1063

An Economic Two-Stage Screening Procedure with a Prescribed Outgoing Quality in Logistic and Normal Models
D.S. Bai, H.M. Kwon, and M.K. Lee 1081

The Evolution of a Selection System
R.R. Read 1099

Optimal Timing Schedules in Earliness-Tardiness Single Machine Sequencing
W. Szwarc and S.K. Mukhopadhyay 1109

An Exact Aggregation/Disaggregation Algorithm for Large Scale Markov Chains
D.S. Kim and R.L. Smith 1115

Note: A Local-Search Heuristic for Large Set-Covering Problems
L.W. Jacobs and M.J. Brusco 1129

Issue 8, December 1995

Facility Location and Capacity Acquisition: An Integrated Approach
V. Verter and M.C. Dincer 1141

Consistency of Several Variants of the Standardized Time Series Area Variance Estimator
H. Damerdji and D. Goldsman 1161

A Search Game on the Union of Graphs With Immobile Hider
L. Pavlović 1177

Weak Order Stability Under Risk
T. Kämpke 1191

Use of a Classifier in a Knowledge-Based Simulation Optimization System
I.W.M. Crouch, A.G. Greenwood, and L.P. Rees 1203

Distributions of Manufacturer's and User's Replacement Costs Under Warranty
I. Sahin and H. Polatoglu 1233

A Note on Minimizing the Expected Makespan in Flowshops Subject to Breakdowns
C. Du and M. Pinedo 1251

Minimizing the Weighted Sum of Quadratic Completion Times on a Single Machine
F. Della Croce, W. Szwarc, R. Tadei, P. Baracco, and R. Di Tullio 1263

Note: Start-Up Demonstration Tests Under Correlation and Corrective Action
N. Balakrishnan, K. Balasubramanian, and R. Viveros 1271

Appreciation to Referees 1277

Author Index 1281
